The BodyTalk System addresses various factors that bring about disease on all levels, e.g. emotional, physical, mental, spiritual, environmental, genetics, to uncover and correct the root causes of symptoms reflected as dis-ease in the bodymind. BodyTalk facilitates communication with the bodymind's consciousness, or innate wisdom, through the use of muscle testing to discover these factors and bring them back into balance with the body's physical and energetic systems. This communication results in a scientific formula that is brought to interface with the body's electromagnetic field by tapping a standing wave over the brain and heart to facilitate the changes requested.
